Step 1

Step 2

Step 3

Step 4

Step 1

Start with a 8 1/2" x 11" paper. Fold paper in half vertically and unfold.

Step 2

Next fold the top corners inward to the center crease.

Step 3

Fold the top point downward as shown.

Step 4

Fold the top corners inward to the center crease and then unfold the right side corner.

Step 5

Put your index finger under the flap and lift the flap towards the left.

Step 6

Flip the flap to the left side.

Step 5

Step 6

Step 7

Step 8

Step 7

Fold the new triangle flap to the left side.

Step 8

Unfold the left side flap.

Step 9

Step 10

Step 9

Repeat steps 5, 6 and 7 for the left side.

Step 10

The fold should look like this.

Step 11

Step 12

Step 11

Fold the both side flaps toward the center line and unfold.

Step 12

Make a mountain fold at the top corner section.

Step 13

Step 14

Step 13

Put your index finger under the flap as shown with the green arrow. Pull up the top flap corner while pressing the base part with your index finger.

Step 14

Pull up the tip. This part becomes airplane's nose.

Step 15

Fold the model in half. Use a mountain fold.

Step 16

Step 16

Fold the wing downward. Repeat on the other. The model should look like the picture shown in 17.

**Step 15****Step 17****Step 18****Step 17**

Add a rudder as shown in this diagram. It should be 3/4 inches height, and should be parallel with the body of the airplane. Repeat for the other wing.

Step 18

The F-16 Falcon jet is complete. Bend the trailing edge of the wings slightly upwards. This will compensate for the airplane's tendency to nose dive.
